DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Rejections not maintained are withdrawn.

Response to Amendment

3. Claims 1-4 are rejected under 35 U.S.C. 102 (b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Meguro et al. (US 5514461), substantially for the reasons set forth in sections 5 and 7 of Paper No. 6, together with the following additional observations.

It is noted that the newly amended claim 1, lines 7-8, now recites "a porosity of not less than 54.0% and not more than 73.0%, a breaking strength of 70-500 Kgf/cm² and a breaking extension of 200-800%".

With respect to Applicants' Response arguing that "all of the porous membranes prepared in the examples show porosity of 50% or less.... Megruo does not teach a microporous membrane having a high porosity" (Response, page 3, second paragraph), the Examiner notes that Megruo's teaching is not limited by the data presented by the examples; in fact, Megruo expressly teaches that the porous membrane of his invention generally has a porosity from 20 to 80% (column 5, lines 19-20), Applicants' argument to the contrary notwithstanding.

Art Unit: 1771

With respect to the newly added tensile properties in claim 1, ^{these are} ~~it is~~ believed to be either inherently disclosed by Megruo, or an obvious optimization to one of ordinary skill in the art, since the reference clearly teaches essentially the same melt extrusion process to make the highly porous PVDF membrane as the instant claimed invention.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
